INTRODUCTION

On 23 April 2007, Peermont Global (Proprietary) Limited (“Peermont, Successor or the issuer”), issued €520 000 000 7³/₄% Senior Secured Notes due 2014 (“the notes”). The notes were issued and guaranteed under an indenture (“the indenture”), dated as of 23 April 2007, by Peermont, a company incorporated under the laws of the Republic of South Africa, Peermont Global Holdings II (Proprietary) Limited (“PGH II”), as parent guarantor, and Peermont Global (North West) (Proprietary) Limited, Peermont Global (KZN) (Proprietary) Limited, Peermont Global (Limpopo) (Proprietary) Limited, Peermont Global Management (NW&L) (Proprietary) Limited and Peermont Global Management (KZN) (Proprietary) Limited, as “guarantors” (each a “guarantor” and collectively the “guarantors”), Maxitrade 85 Security Holding Company (Proprietary) Limited, a special purpose vehicle (“the Security SPV”), BNY Corporate Trustee Services Limited, as trustee (“the Trustee”), The Bank of New York, as registrar, transfer agent and principal paying agent and BNY Fund Services (Ireland) Limited, as Irish paying agent.

A copy of the offering memorandum dated 18 April 2007, prepared in connection with the offering of the notes (“the offering memorandum”), is available from us upon request. This quarterly report is being provided to holders of the notes pursuant to Section 4.19 of the indenture.

The notes bear interest at a rate of 7³/₄% per year. Interest on the notes is payable on 30 April and 30 October of each year, and commenced on 30 October 2007. The notes will mature on 30 April 2014. Peermont may redeem the notes in whole or in part at any time on or after 30 April 2010 at the redemption price specified in the indenture. Prior to 30 April 2010, we may also redeem all or part of the notes by paying a “make whole” premium. In addition, prior to 30 April 2010, we may also redeem up to 35% of the aggregate principal amount of the notes with the net proceeds from certain equity offerings.

The notes, which are the issuer’s senior secured obligations, are guaranteed by the guarantors, and rank equal in right of payment with all of the issuer’s existing and future unsubordinated indebtedness and senior in right of payment to all of the issuer’s existing and future indebtedness that is subordinated in right of payment to the notes.

The notes are effectively senior to all of the issuer’s existing and future unsecured indebtedness to the extent of the assets securing the notes and are secured by first priority security interests over all of the issuer’s capital stock and certain of the assets of the issuer and the guarantors. The guarantees of the notes by the guarantors rank equal in right of payment with all of the existing and future unsubordinated indebtedness of the guarantors, senior in right of payment to all of the existing and future indebtedness of the guarantors that is subordinated in right of payment to the guarantors guarantees of the notes and are effectively senior to all existing and future unsecured indebtedness of the guarantors to the extent of the assets securing the guarantors of guarantees of the notes.

The notes are listed on the Irish Stock Exchange and traded on its Alternative Securities Market.

The notes have not been and will not be registered under the U.S. Securities Act of 1933, as amended (“the U.S. Securities Act”), or any state securities laws and, unless so registered, may not be offered or sold except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the Securities Act and applicable state securities laws. Accordingly, the notes were offered and sold only to qualified institutional buyers (as defined in Rule 144A under the Securities Act) and pursuant to offers and sales occurring outside the United States within the meaning of Regulation S under the Securities Act. The indenture is not required to be, nor will it be, qualified under the U.S. Trust Indenture Act of 1939, as amended.

CERTAIN DEFINITIONS

Peermont or the issuer

The issuer was formed for the purpose of acquiring all of the operations, assets and liabilities of Peermont Global Investments Limited (Registration number 1995/004449/06) (“Old Peermont Global” or “Predecessor”) and substantially all its subsidiaries (“the Corporate Reorganisation”), which forms part of the Transactions (as defined herein). Following the completion of the Transactions, which occurred on 24 April 2007, the issuer changed its legal name to Peermont Global (Proprietary) Limited, and directly owns and operates all of the assets of Old Peermont Global and is wholly owned by PGH II, which in turn, is wholly owned by Peermont Global Holdings I (Proprietary) Limited (“PGH I”) (Registration number 2006/023109/07), each of which was a newly established private company with no trading history, assets or liabilities.

For purposes of this report, references to Old Peermont Global and Predecessor Company are to Peermont Global Investments Limited and references to Peermont, the issuer and/or successor company are to Peermont Global (Proprietary) Limited, the issuer of the notes. In addition, references to we, us, our, the company and Group, in respect of periods prior to the Transactions, refer to the operations of Old Peermont Global and in respect of periods subsequent to the Transactions, to the operations of the issuer giving effect to the Transactions, in each case, unless the context otherwise requires, including Peermont and the issuer consolidated subsidiaries during the relevant periods.

The Transactions

The proceeds from the issuance of the notes were used to finance certain aspects of the Transactions described below.

In November 2006, the issuer made an offer to acquire the ordinary share capital of Old Peermont Global. The offer was effected through a scheme of arrangement between Peermont and its shareholders pursuant to section 311 of the South African Companies Act (“the scheme”). The scheme became operative on 24 April 2007 and Old Peermont Global became a wholly owned subsidiary of the issuer.

Old Peermont Global shareholders received a cash consideration of R13,08 per ordinary share of Old Peermont Global, representing an aggregate consideration of R4 316,0 million (€449 million).

In connection with the scheme, certain minority shareholders of the joint venture entity that owned Emperors Palace exchanged their joint venture interests for cash, ordinary shares and preference shares of PGH I (“the Emperors Palace Reorganisation”). As a result of the Emperors Palace Reorganisation, the joint venture entity that owned Emperors Palace became a wholly owned subsidiary of Peermont, which is accounted for on a fully consolidated basis.

Following the scheme becoming operative, the issuer and certain of its newly formed subsidiaries acquired Old Peermont Global’s business, including the operations, assets and liabilities of Old Peermont Global and substantially all of its subsidiaries (“the Corporate Reorganisation” and, together with the Emperors Palace Reorganisation, “the Reorganisations”). In addition, the issuer acquired for cash from certain minority shareholders of Peermont Global Tusk Holdings (Proprietary) Limited (“Tusk Holdings”) their equity interests in Tusk Holdings (“the Tusk minorities buyout”). As a result of the Tusk minorities buyout, Tusk Holdings became a wholly owned subsidiary of the issuer. In addition, pursuant to the Corporate Reorganisation, certain current and future minority shareholders, which are staff incentive trusts (“the staff trusts”), of certain subsidiaries of Tusk Holdings, purchased investments in certain of the newly formed subsidiaries of the issuer. We refer to the scheme, the Reorganisations and the Tusk minorities buyout collectively, as the Transactions.

ORGANISATIONAL INFORMATION

The Peermont Group consists predominantly of:

- ◆ Peermont Global (Proprietary) Limited is a limited liability company incorporated under the laws of the Republic of South Africa under the Registration number 2006/006340/07, including the Emperors Palace Hotel Casino and Convention Resort (“Emperors Palace”), Mondazur Resort Estate Hotel (“Mondazur”), and Head Office management and investment divisions;
- ◆ Peermont Global (North West) (Proprietary) Limited (“PGNW”) is a limited liability company incorporated under the Laws of the Republic of South Africa under Registration number 2006/028470/07, including the Tusk Rio Casino Resort (“Tusk Rio”), Tusk Mmabatho Casino Resort (“Tusk Mmabatho”) and Tusk Taung Hotel (“Tusk Taung”) divisions;
- ◆ Peermont Global (KZN) (Proprietary) Limited (“PGKZN” or “Tusk Umfolozi”) is a limited liability company incorporated under the laws of the Republic of South Africa under Registration number 2006/029290/07;
- ◆ Peermont Global (Limpopo) (Proprietary) Limited (“PGLim” or “Tusk Venda”) is a limited liability company incorporated under the laws of the Republic of South Africa under Registration number 2006/034446/07;
- ◆ Peermont Global Management (NW&L) (Proprietary) Limited (“PGMNW&L”) is a limited liability company incorporated under the laws of the Republic of South Africa under Registration number 2006/029265/07;
- ◆ Peermont Global Management (KZN) (Proprietary) Limited (“PGMKZN”) is a limited liability company incorporated under the laws of the Republic of South Africa under Registration number 2006/000558/07;
- ◆ Peermont Global (Southern Highveld) (Proprietary) Limited (“PGSH” or “Graceland”) is a limited liability company incorporated under the laws of the Republic of South Africa under Registration number 1995/004452/07;
- ◆ Peermont Global (Botswana) (Proprietary) Limited (“PGB”) is a limited liability company incorporated under the laws of the Republic of Botswana under Registration number 95/414, including all operations based in Botswana, namely the Grand Palm Hotel, Casino and Convention Centre, Mondior Summit Hotel, Metcourt Lodge Hotel, Metcourt Inn Hotel, the Gaborone International Convention Centre, Sedibeng Casino in Francistown and Syringa Casino in Selebi-Phikwe;
- ◆ Peermont Global (Tubatse) (Proprietary) Limited (“Tubatse”);
- ◆ Peermont Global (Eastern Free State) (Proprietary) Limited (“PGEFS” or “Frontier Inn”) is a limited liability company incorporated under the laws of the Republic of South Africa under Registration number 1999/011534/07; and
- ◆ Various other dormant or intermediate holding companies.

The business address of Peermont is Peermont Place, 152 Bryanston Drive, Bryanston, Johannesburg, South Africa, and its primary telephone number is +27 (11) 557 0557. We maintain an internet website at www.peermont.com. Information on our internet website is not part of this report.

PRESENTATION OF FINANCIAL INFORMATION

We have prepared the condensed unaudited consolidated financial statements contained in this quarterly report in accordance with International Financial Reporting Standards (“IFRS”). We present our financial statements in South African rand. In this quarterly report, unless otherwise indicated, all amounts are expressed in South African rand.

Management has included, as additional information that does not form part of this report, certain additional unaudited pro forma financial information prepared on a “like for like basis” to give investors a more comparable picture of the performance of the group in the periods reported on, in Annexure B.

The accounting policies of PeerMont are set out in Annexure C.

Annexure D has been included with this report to give investors an understanding of the future expected cash flows from our revised hedging arrangements, following the notes buy back.

INFORMATION REGARDING FORWARD-LOOKING STATEMENTS

The following cautionary statements identify important factors that could cause our actual results to differ materially from those projected in any forward-looking statements made in this quarterly report. Any statements about our expectations, beliefs, plans, objectives, assumptions or future events or performance are not historical facts and may be forward looking. These statements are often, but not always, made through the use of words or phrases such as will likely result, are expected to, will continue, believe, is anticipated, estimated, intends, expects, plans, seek, projection and outlook.

These statements involve estimates, assumptions and uncertainties that could cause actual results to differ materially from those expressed in them. Any forward-looking statements are qualified in their entirety by reference to the risk factors discussed in the offering memorandum. Among the key risk factors that have a direct bearing on the results of operations are:

- ◆ our dependence on a single property, Emperors Palace, and the relatively concentrated casino market in Gauteng Province to generate a significant portion of our revenue, profits and cash flow;
- ◆ our dependence on a functional and efficient power and transport infrastructure to provide access to our casinos and hotels;
- ◆ competition from other casinos in Gauteng Province and other regions of South Africa;
- ◆ our ability to amend current licence terms to increase our gaming positions and introduce new games and our ability to renew our licences;
- ◆ changes in the gaming laws and the wider regulatory and legal environment in South Africa;
- ◆ general economic conditions that impact growth trends in disposable income and discretionary consumer spending; and
- ◆ our ability to integrate newly acquired operations.

Because the risk factors referred to above and in the offering memorandum could cause actual results or outcomes to differ materially from those expressed in any forward-looking statements made in this quarterly report by us or on our behalf, you should not place undue reliance on any of these forward-looking statements. Further, any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events. New factors will emerge in the future, and it is not possible for us to predict which factors they will be. In addition, we cannot assess the effect of each factor on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those described in any forward-looking statements.

MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

PeerMont is the holder of the second largest number of casino licences in South Africa. We operate a total of 14 properties, nine in South Africa and five in neighbouring Botswana. Together, as of 31 March 2008, these included 3 254 slot machines, 144 gaming tables and 1 312 hotel rooms. Our flagship property is Emperors Palace, which is strategically located near the OR Tambo International Airport in the greater Johannesburg metropolitan area. In addition to Emperors Palace, our property portfolio includes five other casino resorts, four stand-alone casinos and four stand-alone hotels. Certain of our larger casino resorts also feature convention facilities and theatres.

Financial statements discussed

The issuer of the notes was formed for the purpose of acquiring all of the assets of Old Peermont Global. The transaction occurred on or about 24 April 2007, the closing date of the offering of the notes. The issuer today directly owns and operates substantially all of the assets owned and operated by Old Peermont Global prior to the transactions.

In terms of the scheme of arrangement, almost all of the businesses of Old Peermont Global were sold to Peermont with effect from the morning of 25 April 2007. This resulted in a cut-off date of 24 April being applied to all Old Peermont Global companies where the businesses were sold to new entities, and the new businesses/entities commencing trading on 25 April 2007.

For the three-month period ended 31 March 2008, we have provided condensed unaudited consolidated financial information which is derived from the condensed unaudited consolidated income statements of our predecessor company for the three-month period from 1 January 2007 to 31 March 2007, respectively, and the condensed unaudited consolidated income statements of the successor company for the three-month period from 1 January 2008 to 31 March 2008. The condensed unaudited financial information has been derived exclusively from the income statements of the predecessor and successor companies. This does not take into account that the two companies' accounts are reported on a different basis. Amounts for depreciation in the income statement of the predecessor company calculated on a historical cost basis are included with amounts for depreciation in the income statement of the successor company calculated on a fair value basis.

It must be highlighted that the information for the predecessor company only proportionately consolidated the Emperors Palace operation at approximately 83% whereas this operation is fully consolidated in the successor company.

The condensed unaudited consolidated financial information is provided for information purposes only and does not purport to present our historical results of operations for the periods presented, nor is it necessarily representative of our results of operations for any future periods.

Joint ventures

PGSH is not a subsidiary of Peermont and did not become a subsidiary in connection with the Transactions. It is also operated as a joint venture that is not under Peermont's exclusive control during the periods discussed. Its results of operations were proportionately consolidated with the results of Peermont's other operations during the periods under review. 97% of PGSH's results were proportionally consolidated in Peermont's condensed unaudited consolidated results of operations for all periods presented, except for the pro forma information provided in Annexure B.

We currently own 50% of the issued ordinary shares in PGSH, the entity that owns and operates Graceland. Under the terms of the shareholders agreement entered into with our joint venture partners in respect of PGSH, we are entitled to dilute our joint venture partner's holdings so that we will own up to approximately 97% of the issued share capital in PGSH, any such dilution being subject to the approval of the relevant gambling board. Having regard to the gambling board's requirements, we may not be able to exercise our rights in full. Subject to the approval of the relevant gambling board, we intend to partially exercise these rights so that we will, directly or indirectly, hold between 70% and 75% of the issued share capital in PGSH. Following such event, PGSH will become our subsidiary and, accordingly, we will fully consolidate its results of operations, assets and liabilities in our condensed unaudited consolidated financial statements and reflect a minority interest of between 30% and 25% in PGSH.

Key income statement items

Revenue

Our revenue consists of gaming revenue, rooms revenue, food and beverage revenue and other revenue. For the year ended 31 December 2007, we generated 81,4% of our total revenue from gaming, 8,1% from rooms, 7,6% from food and beverage and 2,9% from other revenue.

We generate gaming revenue from the slot machines and gaming tables in our casinos. Gaming revenue consists of the net cash amounts received from bets placed by guests less winnings paid to them.

Rooms revenue is generated from room nights sold at our various hotels, which is a function of average room rate and occupancy rate. We define occupancy rate as room nights sold as a percentage of total room nights available in a given period. The average room rate is calculated based on total rooms revenue divided by the number of room nights sold in a given period.

We generate food and beverage revenue from the sale of food and beverages in our hotel restaurants and through room service, catering services at our convention facilities and revenue from renting banquet rooms and equipment.

Other revenue is generated primarily from rental payments received from our retail outlet tenants, from sales of goods at our own outlets, from ticket receipts for our various entertainment offerings, from childcare facilities and parking and other entrance fees.

In line with industry practice in South Africa, we recognise gaming revenue on a cash-received basis. We recognise all other revenue on an accrual basis, net of Value Added Tax ("VAT"). Gaming revenue includes VAT and other gaming levies on gross gaming revenue. VAT is deducted as an operating cost at an effective rate of 12,28% of gross gaming revenue net of gaming levies paid. Gaming levies on gross gaming revenue are set at variable rates as a percentage of gaming revenue and are also deducted as an operating cost. Gaming levy rates vary across the provinces in which our casinos operate. The gaming levy in Gauteng Province is currently 9% of gaming revenue.

Other income

Other income is primarily non-operational income, which consists of items such as the net profit generated on the disposal of assets in the normal course of business at our properties.

Operating costs

Our operating costs consist of employee costs, other operational costs, VAT and gaming levies on gross gaming revenue, promotions and marketing costs, depreciation and amortisation and property and equipment rentals. These represented 32,3%, 25,6%, 22,8%, 8,1%, 9,1% and 2,1% of total operating costs, respectively, for the financial year ended 31 December 2007.

Employee costs consist of salaries, wages and employee benefits for all of our employees, including management. VAT and gaming levies on gross gaming revenue are as discussed above.

Promotions and marketing costs consist primarily of costs associated with all complimentary food, beverage and hotel accommodation given to our gaming guests; advertising costs (which include costs for radio, press and outdoor advertising and the production thereof and prizes given as part of promotions); costs relating to loyalty programmes; costs of public relations events and activities; publishing costs for guest magazines, flyers, posters and other promotional materials, and costs relating to our participation in domestic and international travel fairs and exhibitions.

Depreciation and amortisation consists of depreciation costs on assets other than land and capital work in progress and amortisation of intangible assets other than goodwill and intangible assets that have an indefinite life, such as our casino licenses.

Property and equipment rentals consist of rental expenses paid under operating leases primarily for our slot machines, office equipment and property leases.

Other operational costs consist primarily of cost of sales of food and beverage; utilities and taxes; property and related facilities and equipment maintenance costs; cash handling costs and credit card commissions; security and public safety costs; property cleaning costs; information technology support and maintenance costs; corporate social investment costs; insurance costs, and training costs.

Primary factors affecting results of operations

Acquisitions

As explained previously, the unaudited results for the predecessor company include the results of Emperors Palace on a proportionately consolidated basis at approximately 83%, whereas the successor company fully consolidates the results of Emperors Palace. As Emperors Palace has historically contributed approximately 70% of the group's revenues. This factor, had a significant impact on the comparisons. This reduces the effectiveness of the comparative results for the periods presented.

Results of operations of PeerMont

The following table presents selected condensed unaudited consolidated financial information of PeerMont for the periods indicated. Unless otherwise indicated, the financial information has been derived from the condensed unaudited consolidated financial statements included in Annexure A of this report.

	Three months ended 31 March	
	Successor 2008 (unaudited) R'm	Predecessor 2007 (unaudited) R'm
Income statement data		
Revenue	598,0	498,9
Other income	0,1	(0,1)
Operating costs	(399,8)	(324,0)
Operating profit	198,3	174,8
Finance income	1 302,5	3,4
Finance expenses	(1 695,4)	(42,7)
(Loss)/profit before taxation	(194,6)	135,5
Taxation	103,1	(56,1)
Net (loss)/profit for the period	(91,5)	79,4
Attributable to:		
Equityholders of PeerMont	(98,1)	72,5
Minority shareholders	6,6	6,9
	(91,5)	79,4
EBITDA Reconciliation⁽²⁾		
Operating profit	198,3	174,8
Add: Depreciation and amortisation	41,8	23,6
EBITDA	240,1	198,4
EBITDA margin	40,2%	39,8%

⁽¹⁾ For a presentation of the components of the results of operations above, see the condensed unaudited consolidated financial statements in Annexure A.

⁽²⁾ We define EBITDA as earnings before interest, taxation, depreciation and amortisation. We believe that EBITDA serves as a useful supplementary financial indicator to investors since it is commonly reported and widely accepted by analysts and investors in measuring a company's ability to service its long-term debt and other fixed obligations and to fund its continued growth. Further, EBITDA is a widely accepted indicator in comparing a company's underlying operating profitability with that of other companies in the same industry. EBITDA is not an IFRS measure and you should not consider EBITDA as an alternative to measures of net profit/(loss) as an indicator of operating performance, as a measure of cash flow from operations or as an indicator of liquidity under IFRS. Funds depicted by this measure may not be available for our discretionary use (due to covenant restrictions, debt service payments and other commitments). You should note that EBITDA is not a uniform or standardised measure and the calculation of EBITDA, accordingly, may vary significantly from company to company, and by itself our presentation and calculation of EBITDA may not be comparable to that of other companies. A reconciliation of EBITDA to operating profit for the three months ended 31 March 2007 and 31 March 2008 is presented above.

Commentary on the results for the period

The three month period ended 31 March 2008 (unaudited) compared to the three-month period ended 31 March 2007 (unaudited)

Revenue

Our revenue increased by 19,9% from R498,9 million for the three months ended 31 March 2007 to R598,0 million for the three months ended 31 March 2008, partially as a result of the current period including 100% of the revenues of Emperors Palace, compared with 83% in the prior year; and partially as a result of organic growth.

Gaming revenues improved by 18,8% from R404,8 million to R481,1 million. Total Emperors Palace revenues grew by 2,2% and PGB and Tusk Umfolozi performed well with growth of 35,1% and 11,0%, respectively.

Rooms revenues improved by 32,4% in the three months. In addition, room rates and occupancies increased at most units.

Operating costs

Operating costs for the three months ended 31 March 2008 were R399,8 million, an increase of R75,8 million, or 23,4%, from R324,0 million for the three months ended 31 March 2007. This was mainly due to the change in holding of Emperors Palace. In addition, VAT and gaming levies on gross gaming revenue at R94,2 million were R15,4 million up on the prior period, due to the higher revenues reported.

Depreciation and amortisation for the three months ended 31 March 2008 was R41,8 million, an increase of R18,2 million, or 77,1%, from R23,6 million for the three months ended 31 March 2007. This increase was due primarily to the increased size of the group, as well as additional depreciation on the revalued property, plant and equipment acquired from the date of the Transactions. From 25 April 2007 the group increased the average depreciation rate on certain buildings from 1% to 2,6% based on a re-estimation of the future lives of these buildings.

Operating profit

The resulting operating profit at R198,3 million was R23,5 million, or 13,4% above the prior period.

EBITDA

EBITDA increased by 21,0% from R198,4 million to R240,1 million over the same period, due to the growth in revenues and the change in holding in Emperors Palace.

Finance income

Finance income for the three months ended 31 March 2008 was R1 302,5 million, an increase of R1 299,1 million over the prior period. The variance to the prior period was due to foreign exchange gains that resulted from the restatement of the FECs hedging the notes liability at the end of the current quarter. The local currency weakened considerably against the Euro during the current quarter and the gain is largely offset by the currency exchange losses recognised on the notes liability as explained below.

Finance expenses

Finance expenses at R1 695,4 million were R1 652,7 million up on the prior period, largely due to interest costs of R134,1 million incurred on the notes; interest of R101,6 million on the deeply subordinated shareholder loans; and net foreign exchange losses of R1 447,7 million. The foreign exchange loss for the period was recorded on the translation of the notes liability at the end of the quarter, largely as a result of the devaluation of the local currency against the Euro.

Taxation

Taxation at a credit of R103,1 million was well below the R56,1 million charge in the prior year, primarily due to the higher interest charges incurred as a result of the transactions and as a result of a tax charge of R116,6 million which was recognised directly in equity as a result of gains made during the period on the hedging instruments.

Loss for the period

The resulting loss after taxation at R91,5 million was below the prior period profit of R79,4 million. The overall variance to prior period was mainly due to the increased holding in Emperors Palace, offset by increased financing charges and the effects of the foreign exchange contracts/exposures.

Liquidity and capital resources

Historically, our liquidity requirements have arisen primarily from the need to fund our capital expenditure and our acquisitions. Our principal source of liquidity has been our cash flows from operating activities and borrowings under our credit facilities. Our liquidity requirements will arise primarily to meet our debt service obligations in respect of the notes and to fund capital expenditures and working capital requirements, if any. Our principal sources of liquidity are expected to be cash flows from operations; future borrowings permitted by the indenture; and, amounts available under our revolving credit facility.

We may from time to time seek to repurchase amounts of the notes through cash purchases and/or exchanges for equity, in open market purchases, privately negotiated transactions or otherwise. Such repurchases or exchanges, if any, will depend on prevailing market conditions, our liquidity requirements, contractual restrictions and other factors. The amounts involved may be material. We may fund these requirements with funds realised from our hedging arrangements, operating cash flows and, subject to the satisfaction of the required conditions to borrowing, drawings under our revolving credit facility or additional debt.

Notes buy back

Subsequent to the period end, Peermont completed a notes repurchase programme in terms of which the company purchased a nominal value of R1 268,6 million (€103,9 million) of the notes in issue for R1 129,2 million (€92,5 million) or 89% of the face value. A public tender process was utilised to purchase a nominal value of R1 060,8 million (€86,9 million) and a further R207,5 million (€17,0 million) was subsequently purchased in the open market.

All purchased notes were cancelled. Following such cancellation, the outstanding principal amount of notes, based on the transaction spot rate, was R5 079,5 million (€416,1 million).

The debt repurchase programme was financed by realising R1 129,2 million (€92,5 million) of value in the Forward Exchange Contracts (FECs) used to hedge the original notes exposure. Approximately 77,7% of the value of existing hedges was realised.

The unwound FECs were replaced by entering into credit contingent cross currency swaps. Approximately 27,8% of the total foreign exchange exposure arising from the notes is now hedged using the original vanilla FECs and the balance of approximately 72,2% of the exposure is hedged using credit contingent cross currency swaps.

Annexure D has been included with this report to give investors an understanding of the future expected cash flows from our revised hedging arrangements.

Cash flows

For the three month periods ended 31 March 2007 and 2008, we have provided condensed unaudited consolidated cash flow information which is derived from the condensed unaudited consolidated cash flow statement of our predecessor company for the three month period from 1 January 2007 to 31 March 2007, and the condensed unaudited consolidated cash flow statement of the successor company for the three month period from 1 January 2008 to 31 March 2008.

The condensed unaudited financial information has been derived exclusively from the cash flow statements of the predecessor and successor companies. These do not take into account that the two companies' accounts are reported on a different basis. Amounts reported in the income statement of the predecessor company on a historical basis have been presented with amounts reported in the income statement of the successor company on a fair value basis. The condensed unaudited cash flow information is provided for information purposes only and does not purport to present our historical cash flows for the period presented, nor is it necessarily representative of our cash flows for any future periods.

The following table presents our condensed unaudited consolidated cash flows for the periods indicated.

	Three months ended 31 March	
	Successor 2008 (unaudited) R'm	Predecessor 2007 (unaudited) R'm
Cash flows from operating activities	224,3	197,7
Finance income	15,1	3,4
Finance expenses	(4,9)	(33,2)
Taxation paid	(2,8)	(13,6)
Cash flows generated from operating activities	231,7	154,3
Cash flows from investing activities	(31,1)	(24,4)
Cash flows from financing activities	2,1	(54,4)
Net increase in cash and cash equivalents	202,7	75,5

Cash flows from operating activities

Net cash in flows from operating activities for the period was R224,3 million compared to R197,7 million in the predecessor company. This increase was due to the effect of the increased holding in Emperors Palace and organic growth.

Finance income

This consists mainly of the cash received on the cash deposits at financial institutions, which has increased in comparison to the prior period.

Finance expenses

This is made up predominantly of interest paid on borrowings by PGB and the PGEFSH group. In the predecessor company the expense consisted predominantly of cash paid as preference dividends to the holders of preference shares of R13,8 million, and interest costs incurred on debt in the predecessor company, prior to the transactions. All interest relating to the notes and shareholders loans has been eliminated as non cash flow at the reporting date.

Taxation paid

The predecessor group made certain taxation payments in the ordinary course of business, and certain of the subsidiaries, such as PGSH, PGB, PGEFSH and PGEFS, will continue to incur taxation cash flows.

Cash flows from investing activities

Capital expenditure for the three months was R31,1 million, predominantly on new projects, building maintenance and replacement of gaming equipment.

Cash flows from financing activities

Net cash in flows from financing activities for the period amounted to R2,1 million. Borrowings totalling R50,9 million, existing in the predecessor company, were repaid during the comparative period of 2007.

Cash and cash equivalents

At 31 March 2008 the Peermont Group had R665,2 million in cash resources available to service debt, working capital requirements and new projects. Approximately R40,0 million of this is required for operational and casino floats at the various properties.

Capital expenditures

Our capital expenditures in the three months ended 31 March 2008 and 31 March 2007, were R31,1 million and R24,6 million, respectively, representing approximately 5,2% and 4,9% of total revenue for those periods. Cash used for capital expenditures consists primarily of (a) cash used for the replacement of gaming equipment and hotel furniture, fittings and equipment and property refurbishment, as well as other assets used for the maintenance of our properties, plant and equipment net of proceeds received from the sale of property, plant and equipment ("maintenance capital expenditure"); and, (b) cash used to expand (other than by way of acquisitions) our business capacity to increase revenue and profitability ("expansion capital expenditure"). Expansion capital expenditure includes the purchase of additional gaming equipment, expansion of existing properties and the development of new properties.

Our maintenance capital expenditures in the three months ended 31 March 2008 and 31 March 2007 were R4,5 million and R24,6 million, representing approximately 0,8% and 4,9% of total revenue, respectively. Our maintenance capital expenditures for both periods reflected ordinary course maintenance and replacement of gaming equipment, primarily slot machines, hotel furniture, fittings and equipment.

Our expansion capital expenditures in the three months ended 31 March 2008 were R26,6 million, representing approximately 4,4% of total revenue for the period. This consisted of payments by PGB of R3,0 million for the upgrade and expansion work performed at the Sedibeng and Syringa Casinos purchased during 2007; R5,3 million incurred by PGNW on construction work performed on the Rio Metcourt Hotel; R0,4 million was incurred on initial costs relating to the relocation of the Tusk Umfolozi complex to Richards Bay; and approximately R17,9 million was spent on the new Metcourt Hotel at Emperors Palace. No expansion capital expenditure was incurred during the three-month period ended 31 March 2007.

Available capital resources

Following the completion of the offering and subsequent partial repurchase of the notes, our principal sources of funds are provided by cash flow from operations; amounts raised as specific project debt allowed per the indenture; and amounts available under our revolving credit facility. At 31 March 2008, of the R400,0 million available under our revolving credit facility for working capital and general corporate purposes, R300,4 million of the facility had been utilised to provide guarantees to various gambling boards and financial institutions, and R99,6 million was available for future borrowings.

Although we believe that our expected cash flow from operations, together with available needs, will be sufficient to meet our needs for the foreseeable future, we cannot assure you that our business will generate sufficient cash flow from operations to meet these needs or that future debt or equity financing will be available to us in an amount sufficient to enable us to fund our working capital or other liquidity needs, including making payments under the notes or our other debt when they become due.

If our working capital requirements exceed our projections, or if our operating cash flow is lower than expected, we may be required to seek additional financing, which may not be available on commercially reasonable terms, if at all. Our ability to arrange financing generally and our cost of capital depends on numerous factors, including general economic conditions, the availability of credit from banks, other financial institutions and in the capital markets, restrictions in instruments governing our indebtedness, and our general financial performance. Our inability to obtain the funding necessary for our working capital requirements could adversely affect our ability to service our debt obligations and adequately fund our operations. See “Risk Factors – risks relating to the notes”, in the offering memorandum. Our business may be adversely affected as a result of our substantial indebtedness, which requires the use of a significant portion of our cash flow to service our debt obligations and may limit access to additional capital. Our ability to generate sufficient cash in the future depends on many factors, some of which are beyond our control.

Scheduled repayments of our current obligations

Set out below is a summary of amounts due and committed under our contractual cash obligations at 31 March 2008:

	Less than			After	Total
	1 year	1–3 years	3–5 years ⁽⁶⁾	5 years	
	R'm	R'm	R'm	R'm	R'm
First priority senior secured notes due 2014 ⁽¹⁾	174,4	—	6 482,1	—	6 656,5
Deeply subordinated shareholder loans ⁽²⁾	—	—	2 308,9	—	2 308,9
Bank borrowings ⁽³⁾	15,1	33,2	24,4	25,5	98,2
Corporate bond ⁽⁴⁾	—	30,1	—	—	30,1
Promissory note liabilities	5,4	11,8	3,3	—	20,5
Retention creditors	11,5	—	—	—	11,5
Finance lease agreements	0,5	1,2	1,2	—	2,9
Shareholder loan ⁽⁵⁾	—	—	—	3,5	3,5
	206,9	76,3	8 819,9	29,0	9 132,1
Operating lease commitments	10,1	19,1	9,8	63,3	102,3
Total	217,0	95,4	8 829,7	92,3	9 234,4

⁽¹⁾ The amount reflected is €520,0 million disclosed at the current spot rate, plus accrued interest and unamortised issue costs.

⁽²⁾ The amount reflected includes the capital owing, accrued and capitalised interest on long-term shareholder funding from PGH II.

⁽³⁾ Bank borrowings comprise secured loan facilities from financial institutions in South Africa and Botswana, the latter disclosed at the closing spot rate.

⁽⁴⁾ The corporate bond comprises corporate notes issued to institutions in Botswana, disclosed at the closing spot rate, and due on 31 March 2010.

⁽⁵⁾ Shareholder loan to PGEFS Holdings (Proprietary) Limited from an unaffiliated shareholder.

⁽⁶⁾ It is currently the company's intention to refinance the majority, if not all, of the deeply subordinated shareholder loans and the notes, in 2011. Therefore, these amounts are all classified in the 3 – 5 years period.

Pension plans

We provide defined contribution funds for the benefit of employees, the assets of which are held in separate funds.

Our contributions to defined contribution funds are charged to our income statement during the year in which they are incurred.

Off-balance sheet arrangements

We have no off-balance sheet arrangements.

Contingent liabilities

SARS has challenged the taxation effect of a R33,8 million gain made by PGER Holdings (Pty) Ltd on the realisation of a foreign currency option contract in 2005. The company obtained Senior Counsel opinion at the time of submitting the taxation return and consequently treated the gain as non taxable. The company intends to challenge SARS on its interpretation of the law and has referred the matter to its taxation advisers. Should the SARS interpretation prove to be correct, the group may be exposed to an additional taxation liability of approximately R9,8 million, which has currently not been provided for.

Market risk

Foreign currency risk

Our condensed unaudited consolidated financial results are affected by currency transaction and translation effects resulting from fluctuations in the exchange rates between the rand and other currencies, principally the Euro, Botswana pula and U.S. dollar.

In connection with the issuance of the notes, we entered into forward exchange contracts for the first four years from date of issue, covering the rand equivalent of the principal amount of €520 million, substantially all of the estimated early settlement premium and interest due under the notes to that date. Subsequent to the period end, we repurchased €103,9 million of the notes and revised the hedging arrangements as previously disclosed in the report.

Currency transaction effects occur due to the fact that in 2007 we earned 93% of our revenue in rand and incurred approximately 8% of our total costs in pula. We do not hedge this exposure. Currency translation effects occur due to the fact that our Botswana operations earned all of their revenue in pula and also prepared their financial statements in this currency. For group consolidation purposes these financial statements are translated to rand, the group's reporting currency.

From time to time, we incur costs in Euro or U.S. dollars that principally relate to purchases of imported gaming equipment. We enter into foreign exchange contracts, from time to time, to cover foreign exchange payment obligations in respect of these purchases.

Interest rate risk

We generally adopt a policy of managing our exposure to changes in floating interest rates on our borrowings through interest rate swaps.

The notes interest is fixed at 7³/₄% until 2014. The interest on the shareholder loans, the balances of which were R1 027,5 million and R1 281,4 million at period end is set at 18,2% and 18,4% respectively.

Critical accounting policies and use of estimates

The group's accounting policies are set out in Annexure C.

Depreciation of buildings

On acquisition, the successor group reviewed the future expected life of buildings and the components parts thereof and changed the estimated average useful life from 100 to approximately 40 years (1% depreciation to 2,6%).

The preparation of our financial statements requires management to make estimates and judgements that affect the reported amount of assets, liabilities, and net profit. Management re-evaluates its estimates on an ongoing basis. Management bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgements about the value of such assets and liabilities that are not readily available from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Business acquisitions

We account for business acquisitions under the purchase method of accounting. The total value of the consideration paid for acquisitions is allocated to the underlying net assets acquired, based on their respective estimated fair values determined by management using internal and external valuations. We use a number of valuation methods to determine the fair value of assets and liabilities acquired, including discounted cash flow and external market values, and believe that we use the most appropriate measures or combination of measures, to value each asset or liability. We also believe that we use the most appropriate valuation assumptions underlying each of these valuation methods based on the current information available, including discount rates, market risk rates, entity risk rates and cash flow assumptions.

The accounting policy for valuation of business acquisitions is considered critical because the judgements made in determining the estimated fair value and expected useful lives assigned to each class of assets and liabilities acquired can significantly affect the value of the asset or liability, including the effect on deferred taxes, the respective amortisation periods and ultimately net profit. Therefore, the use of other valuation methods, as well as other assumptions underlying these valuation methods, could significantly affect the determination of financial position and results of operations.

Residual value and useful life

We depreciate our assets over their estimated useful lives taking into account residual values, which, following the adoption of International Accounting Standards (IAS) 16 – *Property, plant and equipment (revised)*, are re-assessed on an annual basis. The actual lives and residual values of these assets can vary depending on a variety of factors.

Technological innovation, product life cycles and maintenance programmes impact the useful lives and residual values of assets. Residual value assessments consider issues such as future market conditions, the remaining life of the asset and projected disposal values.

Income taxes

We recognise the net future tax benefit related to deferred income tax assets to the extent that it is probable that the deductible temporary differences will reverse in the foreseeable future. Assessing the recoverability of deferred income tax assets requires us to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecast cash flows from operations and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, our ability to realise the net deferred tax assets recorded at the balance sheet date could be impacted. Additionally, future changes in tax laws in the jurisdictions in which we operate could limit our ability to obtain tax deductions in future periods.

Contingent liabilities

Management applies its judgement to the facts and advice it receives from advisers in assessing if an obligation is probable, more likely than not, or remote. This judgement is used to determine if the obligation is recognised as a liability or disclosed as a contingent liability.

Impairment of intangible assets

We test goodwill and indefinite life assets for impairment annually. This involves using assumptions and judgements regarding future events, such as revenue growth, weighted average costs of capital, increase in maintenance capital expenditure and rates relating to management fees, taxation and gaming levies that principally affect our future cash flows.

Staff incentive scheme costs

The costs associated with certain of our staff incentive schemes are determined using various assumptions and financial estimates.

New accounting interpretations issued and not yet implemented

IAS 1 (revised 2007) Presentation of Financial Statements

Comprehensive revision including requiring a statement of comprehensive income – effective 1 January 2009

IAS 23 (revised 2007) Borrowing Costs

Comprehensive revision to prohibit immediate expensing – effective 1 January 2009

The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction – effective 1 January 2008

New and ongoing developments

New Metcourt Hotel at Emperors Palace

Construction of the the new 248 room Metcourt Hotel, the fourth hotel at the group's Emperors Palace resort, is progressing well and is expected to be completed within the budgeted cost of R170 million. The hotel is scheduled for opening in the first quarter of 2009.

Burgersfort Casino licence

The Limpopo Gambling Board ("LGB") decided not to award the licence as it believed that neither of the two qualifying bids met its criteria. Peermont was informed that its proposed capital expenditure committed to the project of R160 million, was not considered sufficient. The LGB is planning to commence a new bidding process during 2008. In the meantime, Peermont has acquired the land required for this project and is therefore well placed to submit a revised bid.

Mthatha Casino licence

Peermont was appointed as the preferred bidder for the Mthatha Casino licence in the Eastern Cape Province. An unsuccessful bidder instituted legal action against the Eastern Cape Gambling and Betting Board ("ECGGB") in which it is contesting the award process. In addition, Peermont has been informed of a land claim on the property on which the resort is to be developed, in terms of the land restitution legislation in South Africa.

If and when the legal action is settled to satisfaction of the ECGBB, and the land claim has been settled to Peermont's satisfaction, the development process will commence. Peermont is of the view that the current legal actions could result in a protracted delay and is therefore reassessing its participation in this project.

The current bid commitment is to construct a hotel and casino resort at a cost of approximately R215 million.

Tusk Umfolozi Casino relocation

The Peermont board previously approved the relocation of the Tusk Umfolozi Casino at Empangeni to the Richards Bay waterfront area, at an expected cost of R220 million. Following Peermont's successful tender for the required land at Richards Bay, the group is in the process of finalising land purchase agreements. The new casino, hotel and conference facility in Richards Bay is currently planned to include the following facilities:

- ◆ 300 slot machines
- ◆ 16 tables
- ◆ an 80 key hotel
- ◆ a 400 seat (cinema style) conference centre
- ◆ a restaurant
- ◆ show bar.

The company has commenced with the environmental impact assessment approval to speed up the overall process. Construction is expected to commence in the last quarter of 2008, with the resort planned to open in the first quarter of 2010.

Tusk Rio Casino Hotel

The construction of the 70 room hotel (including four suites), a 300 seat (cinema style) conference centre, a new restaurant and an enlarged kitchen to serve the increased requirements of the complex following is well under way. The total budgeted cost of this project remains at R70,0 million. R3,0 million of this was spent in 2007 and the balance of R67,0 million is expected to be spent in 2008. Subject to the necessary approvals from the local authorities and the North West Gambling Board ("NWGB"), the hotel and ancilliary facilities is planned to open in the first quarter of 2009.

Other	14,0	(19,2)	17,3
EBITDA	238,3	7,1	222,5

Results of operations for the three month period ended 31 March 2008 (pro forma) compared to the results of operations for the three month period ended 31 March 2007 (pro forma)

Overview

Group revenue for the quarter increased by 6,5% from R554,7 million to R590,6 million. Gaming revenue increased by 4,2% to R475,6 million, despite Easter falling in the first quarter this year as opposed to the second quarter in the prior year, and hotel and resort revenue increased by 17,1% to R115,0 million. Operating costs excluding depreciation and amortisation were well contained and increased by 5,8% to R351,2 million for the quarter. Under challenging conditions, EBITDA increased by 7,6% to R239,3 million.

Revenue and EBITDA at Emperors Palace grew by R8,7 million (2,2%) and R2,5 million (1,6%) for the period while revenue and EBITDA derived from the balance of the group operations grew by R27,2 million (16,9%) and R13,3 million (19,6%) respectively. In particular, our Botswana operations delivered an exceptional performance with revenues and EBITDA increasing by 32% and 68% respectively.

The lower growth in gaming revenue can be attributed mainly to the Emperors Palace operation in Gauteng, where growth in the casino gaming market slowed significantly, despite a new competitor casino opening in December 2007, due mainly to pressure on disposable income in the form of rising interest rates and increases in food and fuel prices as well as disruption caused to the local economy as a result of power load shedding in the catchment areas.

The reduction in other revenue can be attributed mainly to the decision to in-source food and beverage operations at Tusk Mmabatho and Tusk Venda, the in-sourcing of the Queen of the Nile buffet restaurant at Emperors Palace, a reduction in entertainment income, and the closure of Monsoon Lagoon (in its previous form as a nightclub at Emperors Palace). The in-sourcing of these food and beverage operations resulted in the revenue from concessionaires previously included in other operational income in 2007, being replaced by food and beverage revenue from these operations in 2008.

Operations

Emperors Palace

Revenue at Emperors Palace grew by 2,2% to R402,4 million compared to R393,7 million in the same period of the prior year. Gross gaming revenues ("GGR") grew by 1,4% to R341,5 million. This subdued growth was as a result of the pressures on disposable income as mentioned above and the opening of the seventh casino in Gauteng.

The Silverstar casino on the West Rand opened its doors to the public from 16 December 2007. Despite the opening of the new casino, GGR for Gauteng in the first quarter grew by only 5,6%, resulting in a drop in the market share of competing casinos in Gauteng. Emperors Palace withstood the increased competition relatively well as a result of increased marketing focus and spend.

In contrast to our gaming activities, hotel and resort operations produced very strong rooms revenue growth and increased levels of banqueting business. The weak rand is continuing to make South Africa a more attractive destination and we are continuing to see strong growth in our international segment of rooms revenue.

Rooms revenue increased by 19,9% to R27,1 million compared to R22,6 million in the prior period. The continued positive performance of the rooms department bodes well for the opening of the fourth hotel on the property at the beginning of the new year.

EBITDA at Emperors Palace increased by 1,6% to R157,1 million. EBITDA growth was marginal due to cost growth exceeding the subdued revenue performance against the backdrop of higher inflation levels.

The EBITDA margin declined slightly for the quarter from 39,3% as at 31 March 2007 to 39,0% as at 31 March 2008.

Graceland

Graceland revenues decreased by 2,3% as compared to the prior period to R25,5 million, from R26,1 million in 2007. The adverse performance was due to a decline in GGR which was 4,0% lower than the prior period at R18,6 million, mainly due to economic factors but also partially due to temporary disruption arising from the implementation of a new casino management system in January 2008.

Overhead expenses remained relatively constant as compared to the prior period. However, the increased marketing expenditure to promote the property combined with the revenue deficit on the prior period, resulted in an EBITDA reduction of 15,9% to R5,8 million from R6,9 million in the same quarter of the prior year. This resulted in a margin decline from 26,4% for the first quarter in 2007, to 22,7% for the first quarter ended in 2008.

Botswana

The Botswana operations produced an exceptional performance and increased revenue by 31,8% in Pula terms from Pula 32,4 million (R36,5 million) for the quarter ended 31 March 2007 to Pula 42,7 million (R49,3 million) for the same period in 2008. Gaming revenues improved by 43,8% on the prior period with tables and slots contributing growth of 40,0% and 27,0% respectively. Hotel and resort revenue grew by 25,5% to Pula 26,6 million. The Grand Palm hotel delivered the strongest rooms revenue growth of 30,4% for the quarter. Included in the current quarter is revenue of P0,8 million for the Sedibeng and Syringa casinos in northern Botswana, which opened in December 2007.

EBITDA grew in Pula terms by 67,5% to Pula 13,4 million (2007: Pula 8,0 million). The EBITDA margin improved to 31,4% (2007: 24,7%).

Tusk Rio

Tusk Rio grew revenue by 8,4% to R33,7 million, despite a very strong revenue performance in the prior year's first quarter. The prior year performance was on the back of the resurgent mining activity in the area.

EBITDA increased by 7,0% from R14,3 million in 2007 to R15,3 million in 2008. In the quarter to 31 March 2007 the unit received a credit adjustment to rates and taxes of R0,3 million, which boosted the 2007 quarter's EBITDA. This, notwithstanding effective cost control, resulted in an EBITDA margin of 45,4% (2007: 46,0%).

Tusk Mmabatho

Tusk Mmabatho achieved total revenue of R21,1 million for the quarter, up 28,7% on the same quarter in 2007. This includes additional revenues from the food and beverage department which was in-sourced from January 2008. On a comparable basis, the revenue growth was 15,2% for the period. EBITDA was flat when compared to the same period in the prior year at R4,8 million, resulting in a decline of the EBITDA margin to 22,7% (2007: 25,0%). The decision to in-source the food and beverage department and the related start-up costs was a primary factor in the reduction of margin percentage. EBITDA remained flat as compared to the prior year due to food and beverage start up costs mentioned above, coupled with increased administration and information technology costs.

Khoroni (previously Tusk Venda)

Khoroni completed its rooms and public areas refurbishment in 2007 and the unit has in-sourced the food and beverage department from December 2007. The unit achieved revenue growth of 23,2% to R13,8 million for the quarter. On a comparable basis the revenue growth was 9%. EBITDA at R3,5 million and an EBITDA margin of 25,4%, were below the R3,7 million and 33,0% margin achieved in the same quarter of 2007. Increased payroll costs and a poor performance by the rooms department, as a result of delayed government business, resulted in the decline in EBITDA. The margin reduction was as a direct result of the decision to in-source the food and beverage department and the factors mentioned above.

Tusk Umfolozi

Tusk Umfolozi continued to perform well and revenue was up by 11,0% at R29,2 million compared to the same period in the prior year. EBITDA at R11,1 million was 15,6% up on the prior period. The EBITDA margin continues to improve and was 38,0% for the quarter compared to 36,5% for the same period in 2007.

Frontier Inn

The Frontier Inn and casino achieved revenues of R9,3 million, a growth of 2,2% on the prior period. EBITDA at R1,5 million was 15,4% greater than the 2007 quarter. The EBITDA margin improved to 16,1% (2007: 14,3%).

Head office and management companies (head office)

Head office revenue increased by 22,0%, from R33,2 million in the first quarter in 2007 to R40,5 million in the first quarter in 2008.

Head office EBITDA increased by 27,4% from R18,6 million in the 2007 quarter to R23,7 million in the 2008 quarter. The EBITDA margin reflected an improvement at 58,5% when compared to the 56,0% achieved in the prior period.

The increase in revenue and EBITDA can largely be attributed to growth in revenues and profitability in the managed units and an adjustment made to the management fees earned from Emperors Palace to take into account the revised group structure after the transactions.

Basis of preparation

Peermont was formed to acquire all of the issued ordinary share capital of Peermont Global Limited ("Old Peermont Global") pursuant to a scheme of arrangement between Old Peermont Global and its shareholders (the "scheme"). The scheme became operative on 24 April 2007. As a result of the Scheme, Old Peermont Global became a wholly-owned subsidiary of Peermont effective 24 April 2007. Prior to 24 April 2007, Peermont did not have any assets or operations.

The pro forma unaudited consolidated income statement information for the three month periods ended 31 March 2007 and 2008 presented above are based on:

2007: the three months historical unaudited consolidated income statements of Old Peermont Global;

2008: the three months unaudited consolidated income statements of Peermont;

prepared in accordance with IFRS.

The pro forma unaudited group financial information presented above has been prepared in accordance with Peermont's accounting policies consistently applied during the periods presented.

Pro forma adjustments

The main differences between the pro forma information presented and the reported results in the quarterly report for the periods ended 31 March 2007 and 31 March 2008 are:

- ◆ The Emperors Palace operation has been fully consolidated for the 2007 period on a pro forma basis, and
- ◆ The PGSH operations have been proportionately consolidated at 75%, the estimated future holding after the settlement expected to be reached with the minority shareholders, whereas the quarterly report consistently proportionately consolidates PGSH at the current entitlement of 97%.

As part of the scheme, certain minority BEE shareholders of Old Peermont Global's joint venture that owned the Emperors Palace asset exchanged their joint venture interests for shares in a parent company of Peermont (the "Emperors Palace Reorganisation"). As a result of the Emperors Palace Reorganisation, which became effective in April 2007, the joint venture entity became a wholly owned subsidiary of Peermont and was accounted for on a fully consolidated basis from that date. The Old Peermont Global unaudited consolidated income statement information has been adjusted to include the Emperors Palace Reorganisation as if this occurred on 1 January 2007.

The proportional consolidation of PGSH was reduced from 97% to 75% in the pro forma results. We currently own 50% of the issued ordinary shares of PGSH, the entity that owns and operates Graceland. Under the terms of the shareholders agreement entered into with our joint venture partners in respect of PGSH, we are entitled to dilute our joint venture partners' holdings so that we will own up to approximately 97% of the issued share capital of PGSH, any such dilution being subject to the approval of the Mpumalanga Gaming Board ("MGB"). Having regard to the MGB's requirements, we may not be able to exercise our rights in full. Subject to the approval of the MGB, we intend to partially exercise these rights so that we expect to, directly or indirectly, hold between 70% and 75% of the issued share capital of PGSH.

The pro forma adjustments are based on preliminary estimates, information currently available and certain assumptions that we believe are reasonable, and may be revised as additional information becomes available.

The pro forma unaudited group information is presented for illustrative purposes only and does not purport to represent what the results of the operations of Peermont or Old Peermont Global would have been had the events listed above occurred on 1 January 2007, or to project the future results of operations of Peermont for any future period.

ANNEXURE C

PeerMont Global (Proprietary) Limited **Quarterly report for the three months ended 31 March 2008**

Accounting policies

PeerMont Global (Proprietary) Limited is a company administered in South Africa. The accounting policies have been applied consistently by group entities.

Statement of compliance

The annual financial statements and group annual financial statements have been prepared in accordance with IFRS and its interpretations adopted by the International Accounting Standards Board and the Companies Act in South Africa.

Basis of preparation

The annual financial statements are presented in rand which is the group's functional currency rounded to the nearest million. The annual financial statements and group annual financial statements are prepared on the historical cost basis, except for investments in derivative financial instruments that are stated at fair value. The preparation of annual financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Basis of consolidation

Investment in subsidiaries

Subsidiaries are entities controlled by the company. Control exists when the company has the power, directly or indirectly, to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable or convertible are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. In the company annual financial statements, investments are accounted for at cost less impairment losses.

Investment in joint ventures

Joint ventures are those entities over whose activities the group has joint control, established by contractual agreement. The consolidated financial statements include the group's proportionate share of the entities' assets, liabilities, revenue and expenses with items of a similar nature on a line-by-line basis, from the date that joint control commences until the date that joint control ceases. In the company annual financial statements, investments are accounted for at cost less impairment losses.

Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealised gains arising from intra-group transactions, are eliminated in preparing the consolidated annual financial statements. Unrealised gains arising from transactions with jointly controlled entities are eliminated to the extent of the group's interest in the enterprises. Unrealised losses are eliminated in the same way as unrealised gains, but only to the extent that there is no evidence of impairment.

Principles of consolidation

The consolidated financial statements of the group include the annual financial statements of the company and its subsidiaries and interests in joint ventures. The equity and net income attributable to minority shareholders are shown separately in the balance sheet and income statement respectively. For the purpose of these annual financial statements, cost at acquisition refers to the fair value acquired in accordance with IFRS 3 *Business Combinations*.

Revenue

Revenue derived from hotel and conference activities, food and beverage revenues, rentals, entertainment revenues and other income, is recorded on an accrual basis. Casino winnings are accounted for on a cash received basis. VAT and other taxes levied on casino winnings are included in revenue and treated as expenses as these are borne by the company and not its customers. VAT on all other revenue transactions is excluded from revenue.

Expenses

Operating lease payments

Payments made under operating leases are recognised in the income statement on a straight-line basis over the term of the lease. Lease incentives received are recognised as an integral part of the total lease expense over the term of the lease.

Finance lease payments

Minimum lease payments are apportioned between the finance expense and the reduction of the outstanding liability. The finance charge is allocated to each period during the lease terms so as to produce a constant periodic rate of interest on the remaining balance of the liability.

Finance income and finance expenses

Finance income comprises interest income on funds invested, dividend income, foreign exchange gains and gains on hedging instruments recognised in the income statement. Interest income is recognised in the income statement as it accrues, using the effective interest method. Dividend income is recognised in the income statement on the date the Group's right to receive payments is established which in the case of quoted securities is usually the ex-dividend date.

Finance expenses comprise interest expense on borrowings calculated using the effective interest method, dividends on redeemable preference shares, foreign exchange losses and losses on hedging instruments that are recognised in the income statement. The interest expense component of finance lease payments is recognised in the income statement using the effective interest method.

Taxation

Income taxation on the profit or loss for the year comprises current and deferred taxation. Income taxation is recognised in the income statement except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current taxation is the expected taxation payable on the taxable income for the year, using taxation rates enacted or substantively enacted at the balance sheet date, and any adjustment to taxation payable in respect of previous years.

Deferred taxation is recognised using the balance sheet liability method, providing for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred taxation provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using taxation rates enacted or substantively enacted at the balance sheet date.

A deferred taxation asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred taxation assets are reduced to the extent that it is no longer probable that the related taxation benefit will be realised.

Additional income taxes that arise from the distribution of dividends are recognised at the same time as the liability to pay the related dividend is recognised.

Foreign currency

Foreign currency transactions

Transactions in foreign currencies are translated to the functional currency of the group at the foreign exchange rates ruling at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the balance sheet date are translated to rand at the foreign exchange rate ruling at that date. Foreign exchange differences arising on retranslation are recognised in the income statement. Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated to rand at foreign exchange rates ruling at the dates the fair value was determined.

Financial statements of foreign operations

The assets and liabilities of foreign operations, including goodwill and fair value adjustments arising on consolidation, are translated to rand at foreign exchange rates ruling at the balance sheet date. The revenues and expenses of foreign operations are translated to rand at rates approximating to the foreign exchange rates ruling at the dates of the transactions. Foreign exchange differences arising on retranslation are recognised directly in a separate component of equity.

Net investment in foreign operations

Exchange differences arising from the translation of the net investment in foreign operations, and of related hedges are recognised directly in equity. They are released into the income statement upon disposal.

Property, plant and equipment

Owned assets

Items of property, plant and equipment are stated at cost less accumulated depreciation and impairment losses. The cost of self-constructed assets includes the cost of materials, direct labour, the costs of dismantling and removing the items and restoring the site on which they are located, and an appropriate proportion of production overheads. Where parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

Subsequent expenditure relating to an item of property, plant and equipment is capitalised when it is probable that future economic benefits from the use of assets can be measured reliably. All other subsequent expenditure is recognised as an expense in the income statement as incurred.

The carrying value of freehold buildings is compared to values determined by professional valuers at least once every three years, using the open market value basis in continuation of existing use for land and buildings. When the carrying value of buildings exceeds the value determined by professional valuers, the carrying value is adjusted downwards through a charge to the income statement. The renewal value, if not insignificant, is reassessed annually.

Depreciation is provided on the straight-line basis over the estimated useful lives of property, plant and equipment. Depreciation is not provided on land or capital work in progress. Current depreciation rates for each category of property, plant and equipment are as follows:

Land	0,0%
Buildings	2,6%
Computer equipment	33,3%
Office equipment	16,7%
Plant and machinery	20,0%
Slot machines	16,7%
Gaming equipment	16,7%
Vehicles	20,0% – 25,0%

Hotel, casino and other pre-opening expenses are written off in full in the year of commencement of trading.

The depreciation methods, residual values and useful lives are reassessed at each reporting date.

Gains/(losses) on the disposal of property, plant and equipment are recognised in profit or loss. The surplus or deficit is the difference between the net disposal proceeds and the carrying amount of the asset.

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale, are capitalised up to the date the asset is substantially complete. Capitalisation is suspended during extended periods in which active development is interrupted.

Leased assets

Leases in terms of which the group assumes substantially all the risks and rewards of ownership of the underlying asset to the group are classified as finance leases. Assets acquired in terms of finance leases are capitalised at the lower of fair value and the present value of the minimum lease payments at inception of the lease, and depreciated over the estimated useful life of the asset. The capital element of future obligations under the leases is included as a liability in the balance sheet. Lease payments are allocated using the effective interest method to determine the lease finance expense, which is charged against income over the lease period, and the capital repayment, which reduces the liability to the lessor.

Leasehold buildings are depreciated over the remaining leasehold periods.

Operating leases

Leases where the lessor retains the risks and rewards of ownership of the underlying asset are classified as operating leases. Payments made under operating leases are charged against income and on a straight-line basis over the period of the lease.

Intangible assets

Goodwill

All business combinations are accounted for by applying the purchase method. Goodwill represents amounts arising on acquisition of subsidiaries, associates and joint ventures. Goodwill represents the difference between the cost of the acquisition and the fair value of the net identifiable assets acquired.

Goodwill is measured at cost less any accumulated impairment losses. Goodwill is allocated to cash generating units and is not amortised but is tested annually for impairment.

Negative goodwill arising on an acquisition is recognised directly in profit or loss.

Subsequent expenditure

Subsequent expenditure on capitalised intangible assets is capitalised only when it increases the future economic benefits embodied in the specific assets to which it relates. All other subsequent expenditure is recognised when incurred.

Development expenditure

Development expenditure is capitalised if the proposed development costs can be measured reliably, is technically and commercially feasible, future economic benefits are probable and the group has sufficient resources to complete development and to use or sell the asset. The expenditure capitalised includes the cost of materials, direct labour and an appropriate proportion of overheads that are directly attributable to preparing the asset for its intended use. Other development expenditure is recognised in the income statement as an expense as incurred. Capitalised development expenditure is stated at cost less accumulated amortisation and impairment losses.

Other intangible assets

Indefinite life intangible assets are carried at cost less any impairment losses. The carrying value is assessed at each reporting date for impairment.

Other intangible assets that are acquired by the group are stated at cost less accumulated amortisation and impairment losses.

Expenditure on internally generated goodwill and brands is recognised in the income statement as an expense as incurred.

Amortisation

Amortisation is charged to the income statement on a straight-line basis over the estimated useful lives of intangible assets unless such lives are indefinite. Goodwill and intangible assets with an indefinite useful life are systematically tested for impairment at each balance sheet date. Other intangible assets are amortised from the date they are available for use. The current estimated useful lives per category of intangible assets are as follows:

Goodwill	Indefinite
Casino licences	Indefinite
Right of use of buildings	Lease period
Bid commitment costs	0% – 6,7%
Licence application costs	Indefinite
Computer software	33,3% – 50%
Franchise costs	Lease period
Right to receive management fees	Indefinite

The basis of amortisation, residual values and useful lives are reassessed annually.

Impairment

The carrying amount of the group's assets excluding deferred taxation is reviewed at each balance sheet date to determine whether there is any indication of impairment. If there is an indication that an asset may be impaired, its recoverable amount is estimated.

An impairment loss is recognised whenever the carrying amount of an asset or its cash generating unit exceeds its recoverable amount. A cash generating unit is the smallest identifiable asset group that generates cash flows that are largely independent from other assets and groups. Impairment losses are recognised in the income statement.

Impairment losses recognised in respect of cash generating units are allocated first to reduce the carrying amount of any goodwill allocated to cash generating units (group of units) and then, to reduce the carrying amount of the other assets in the unit (group of units) on a pro rata basis.

Calculation of recoverable amount

An impairment loss in respect of the group's investments in held-to-maturity securities and receivables carried at amortised cost is calculated as the present value of estimated cash flows, discounted at the original effective interest rate. Receivables with a short duration are not discounted, where the effect of discounting is immaterial.

The recoverable amount of other assets or cash generating units is the greater of their fair value less cost to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-taxation discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Reversals of impairment

An impairment loss in respect of a held-to-maturity security or receivable carried at amortised cost is reversed if the subsequent increase in recoverable amount can be related objectively to an event occurring after the impairment loss was recognised.

An impairment loss in respect of an investment in an equity instrument classified as available for sale is not reversed through profit or loss. If the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss shall be reversed, with the amount of the reversal recognised in profit or loss.

An impairment loss in respect of goodwill is not reversed.

In respect of other assets, an impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Financial guarantee contracts

Financial guarantee contracts are classified as insurance contracts as defined in IFRS 4 *Insurance Contracts*. A liability is recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle such contracts and a reliable estimate can be made of the amount of the obligation. The amount recognised is the best estimate of the expenditure required to settle the contract at the balance sheet date.

Derivative financial instruments

The group uses derivative financial instruments to hedge its exposure to foreign exchange and interest rate risks arising from operational, financing and investment activities. In accordance with its treasury policy, the group does not hold or issue derivative financial instruments for trading purposes. However, derivatives that do not qualify for hedge accounting are accounted for as trading instruments.

Derivatives are recognised initially at fair value and attributable transaction costs are recognised in profit or loss when incurred. Subsequent to initial recognition, derivative financial instruments are stated at fair value with any gain or loss

on remeasurement to fair value recognised immediately in profit or loss. However, where derivatives qualify for hedge accounting, recognition of any resultant gain or loss depends on the nature of the item being hedged.

The fair value of interest rate swaps is the estimated amount that the group would receive or pay to terminate the swap at the balance sheet date, taking into account current interest rates and the current creditworthiness of the swap counterparties. The fair value of forward exchange contracts is their quoted market price at the balance sheet date, being the present value of the estimated forward price discounted using a South African rand yield curve.

Other non-derivative financial instruments

Other non-derivative financial instruments are recognised at fair value, plus any directly attributable transaction costs subsequent to initial recognition. Other non-derivative financial instruments are measured at amortised cost using the effective interest method, less any debt issuance costs and impairment losses. Other financial instruments comprise trade and other receivables, trade and other payables, amount due to related parties, interest-bearing borrowings and cash and cash equivalents.

Hedging

Cash flow hedges

Where a derivative financial instrument is designated as a hedge of the variability in cash flows of a recognised asset or liability, or a highly probable forecasted transaction, the effective part of any gain or loss on the derivative financial instrument is recognised directly in equity. When the forecast transaction subsequently results in the recognition of a non-financial asset or non-financial liability, or the forecast transaction for a non-financial asset or non-financial liability the associated cumulative gain or loss is removed from equity and included in the initial cost or other carrying amount of the non-financial asset or liability. If a hedge of a forecast transaction subsequently results in the recognition of a financial asset or a financial liability, the associated gains and losses that were recognised directly in equity are reclassified into profit or loss in the same period or periods during which the asset acquired or liability assumed affects profit or loss (ie, when interest income or expense is recognised). For cash flow hedges, other than those covered by the preceding two policy statements, the associated cumulative gain or loss is removed from equity and recognised in the income statement in the same period or periods during which the hedged forecast transaction affects profit or loss. The ineffective part of any gain or loss is recognised immediately in the income statement.

When a hedging instrument expires or is sold, terminated or exercised, or the entity revokes the designation of the hedge relationship but the hedged forecast transaction is still expected to occur, the cumulative gain or loss at that point remains in equity and is recognised in accordance with the above policy when the transaction occurs. If the hedged transaction is no longer expected to take place, the cumulative unrealised gain or loss recognised in equity is recognised immediately in the income statement.

Hedge of monetary assets and liabilities

Where a derivative financial instrument is used to hedge economically the foreign exchange exposure of a recognised monetary asset or liability, no hedge accounting is applied and any gain or loss on the hedging instrument is recognised in the income statement.

Inventories

Inventories, comprising mainly food and beverage inventories, consumable stores and operating equipment, are valued at the lower of cost and net realisable value. The cost of inventories comprises all costs in bringing the inventories to their present location and condition and is determined using the weighted average method. Obsolete, redundant and slow moving inventories are identified and written down to their estimated net realisable value.

Cash and cash equivalents

For the purpose of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks and investments in money market instruments, net of bank overdrafts, all of which are available for use by the group, unless otherwise stated.

Share capital

Preference share capital

Preference share capital is classified as equity if it is non-redeemable and any dividends are discretionary, or is redeemable but only at the company's option. Dividends on preference share capital classified as equity are recognised as distributions within equity.

Preference share capital is classified as a liability if it is redeemable on a specific date or at the option of the shareholders or if dividend payments are not discretionary. Dividends thereon are recognised in the income statement as an interest expense.

Repurchase of share capital

When share capital recognised as equity is repurchased, the amount of the consideration paid, including directly attributable costs, is recognised as a change in equity. Repurchased shares are classified as treasury shares and presented as a deduction from total equity.

Dividends

Dividends on redeemable preference shares are recognised as a liability and expressed on an accrual basis. Other dividends are recognised as a liability in the period in which they are declared.

Provisions

A provision is recognised in the balance sheet when the group has a present legal or constructive obligation that can be estimated reliably as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-taxation rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

Employee benefits

Short-term employee benefits

The costs of all short-term employee benefits are recognised during the period in which the employee renders the related service. The provisions for employee entitlement to wages, salaries and annual leave represent the amount which the group has a present obligation to pay as a result of employees' services provided to the balance sheet date. The provisions have been calculated at undiscounted amounts based on current wage and salary rates.

Long-term employee benefits

Liabilities for employee benefits which are not expected to be settled within 12 months are discounted using the market yields at the balance sheet date, on high quality bonds with terms which most closely match the terms of maturity of the related liabilities.

Post-employment benefits

Obligations for contributions to defined contribution provident and pension plans are recognised as an expense in the income statement as incurred. The group does not incur any liability for post-employment medical aid benefits.

Offset

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet when the company has a legally enforceable right to set off the recognised amounts, and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Segment reporting

A segment is a distinguishable component of the group that is engaged either in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.
